RULES AND REGULATIONS

1. All entries must be admitted by the Superintendent.
2. All entries and exhibits will be caged under the supervision of the Superintendent. No entry may be removed from the cages, or handled by unauthorized persons, except by permission from the Superintendent. This rule will be strictly adhered to.

3. EXHIBITORS ARE RESPONSIBLE FOR THE FEEDING AND WATERING OF THEIR OWN ANIMALS. Please bring your own food and water dished.
4. Rabbits will be judged by the ARBA standards for each breed.
5. Awards will be made at the judge's discretion.
6. Poultry and rabbits may be housed in the same building.
7. The fair will not be responsible for injury to animals, accidents or damage to exhibits, or personal property.

If a rabbit becomes ill, the owner will be asked to remove it from the fairgrounds.

Please bring a mat or board for your animal to rest on to prevent sore hocks. When the weather is hot you need to check your animal often. To ease the stress of heat you can put a bottle of ice in its cage.

RULES AND REGULATIONS

1. **All entries positively close at 8:00 p.m. Thursday and cannot be removed until 12:30 pm Sunday.**
2. Sheaf forage must be current year's crop. Previous year's crop may be shown in threshed grain and grain sheaves if not shown before.
3. Exhibits will not be eligible for competition unless the specified amount is shown.
4. All sheaves of grain, forages and grasses must not be less than three or more than five inches in diameter just below the heads. Grains must be tied in at least three places. Forages and grasses are to be cured.
5. Judging shall be open to the public and subject to rules of non-interference and decorum.

Hints to Exhibitors

1. Purity and quality of a sample are the two points to remember when preparing samples of threshed grain for show. Purity is valued at 35% and quality at 65%.
2. Wheat - all samples should be free of dirt, weed seeds, chaff, and other grains. There should be no evidence of smut in the sample. The sample should be pure as to variety and class of grain. The grain in the sample ought to be large, plump and of hard flinty texture. A deep, yet clear dark red color is best for milling wheats. It should give a high test weight. The sample should be free from all kinds of damage such as bin pruning, etc.
3. Oats and Barley - Practically the same points for wheat will hold for oats and barley. In oats and barley, fresh clean color is very important. Another important point is the plumpness of the grain, best indicated by a high point per bushel.
4. Sheaf Grain - In sheaf grains, the evidence of high yield and quality are of equal importance. A sheaf of grain should be pure as to variety. The grain must be well matured and of sound vitality.
5. Forage Sheaves - Forage sheaves are judged upon their apparent forage quality, purity and yield. IT IS VERY IMPORTANT THAT THE SHOW SAMPLE BE CURED IN A WAY THAT WILL PRESERVE THE NATURAL GREEN COLOR AND THE MAXIMUM AMOUNT OF FOLIAGE.

- 1121 – Plate of Yellow Crabapples
- 1121A – Plate of Red Crabapples
- 1121B – Plate of Whitney Crabapples

Class II - Vegetables

All vegetables to be of best edible maturity.

RULES AND REGULATIONS

1. Exhibits must contain the specified number of vegetables.
2. Exhibits will be judged on uniformity, maturity, varietal characteristics and freedom from disease and injury.
3. Judging is based on market preference. Most markets prefer a small or medium sized specimen. This is especially true of summer squash.
4. Root Crops: Please see individual listings for carrots, onions, Jerusalem artichokes. Cut off tops leaving approximately 1 inch at top. The roots should be cut off leaving approximately 1 inch except beets, do not cut root.

Wash thoroughly but do not use a brush.

5. Beans and Peas: Leave ¼ to ½ inch stems and select uniform pods. Avoid over-mature pods.
6. Carrots: Select uniform length and thickness, avoid green shoulders.
7. Cured (dried) Onions: Approximately two weeks before Fair, twist tops and remove outer layer of dirty skin, just one layer. Spread out to dry until Fair time. Remove tops leaving about 1 inch and clip roots to approximately 1 inch. DO NOT PEEL ONIONS TO MAKE THEM SHINY.
8. Fresh Onions: Lift just prior to exhibiting, avoiding damage to root node, trim roots leaving ½ inch uniformly. Leave 6 inch top. Remove outer layer to get dirt off and wash. Choose plants that are well blanched or white. Please see Bunching Onions for scallions (green onions).
9. Cucumbers: Variety is important in Lot selection. Do not enter over large picking cucumbers as slicers. Small seed cavity is important.
10. Kohlrabi: Remove roots just below ball. Trim upper leaves to approximately ½ inch above ball. Should not be hard, woody or pithy.
11. Potatoes: After digging, allow them to dry to set skins; clean gently with a cloth and avoid rough handling.
12. Garden Herbs: Annual and perennial herbs should be cut at ground level. A bunch is defined as a commercial quantity, or approximate amounts sold in stores. Quality, not quantity will win awards. Fresh Herbs should be displayed in water.

13. Place all exhibits on paper plates and in clear plastic bags and secure tightly.

14. Rhubarb: choose clean, straight stems, remove all but 1 inch of the leaf; do not remove root ends.
15. Groom all materials you display.

Vegetables: *Please supply cultivar's name.*

RULES AND REGULATIONS

1. All entries must be in the display building by Thursday, 8:00 pm.
2. Entries cannot be removed until 12:30 p.m. Sunday.
3. Do not add more stems than the Fair Book calls for.
4. All foliage should be clean, wash gently before entering.
5. Flowers must be grown by the exhibitor.
6. Exhibitor may enter only 1 item per Lot #.
7. The Madison County Fair is not responsible for flower containers. Plain everyday, CLEAR, plastic or glass may be used.
8. A BLOOM means one (1) flower, foliage as required; a STEM means a single (1) flower on one (1) stem, with foliage; a SPIKE means a single stem possessing many individual florets, foliage as indicated; a SPRAY means three (3) or more flowers per stem, with foliage. A HEAD means the apical bud of a plant, as for flowering cabbage or flowering kale.
9. All foliage below the water line must be removed.
10. Cultivar's names for all Fresh Flowers must be supplied.
11. All Fresh Flowers must be conditioned by hardening the cut plant materials in tepid water over night. Use of floral preservatives is helpful. A SPECIMEN means a typical representative of a genus, species, type or cultivar. Called for when there is a possibility of more than one bloom form per Lot, as in Dianthus and Cosmos, or for a foliage plant.
12. YOUTH: Means any person 15 years of age and under. Youth classes are available in all Lots: youth entries should be designated by a "Y" following the Lot #. Please show age on entry tag.
13. Decorated Hat. Do not use hat for a container for the flowers. The judging is on the decoration of the hat as a flower container.

Hints for Exhibiting Cut Flowers

If plant material is to hold up through the exhibit period, it must be cut no earlier than the day before it is to be exhibited. Cutting should be done about 4:00 in the afternoon, since at that time there is the greatest amount of sugar in the leaves. As soon as the flowers are plunged in water, they take up enough to overcome any apparent wilting. Plunging stem in water about 110 degrees F is usually best. Then setting in a cool room, out of draft, and let the water cool to room temperature. This enables the flowers to regain their rigidity and last longer.

Cut stems cleanly at an angle with a sharp knife and place at once in deep water. Flowers should be kept in deep water eight to twelve hours or overnight. Foliage below the water line should be removed.

Flowers or branches with woody stems should be crushed or pounded before being placed in deep water. Any flower with milky or colorless fluid in their stems may be seared with a flame or the stem end placed in boiling water several minutes. Protect the blossom end by wrapping in newspaper.

Cosmos - always yellow, orange or red exhibit as sprays.
Gladiolus - pop tops off; plastic wrap for standing straight.
Hollyhock and Delphiniums are hollow stemmed. When they are cut, it is important to fill the stem with hot water (Not Boiling): Seal the stem with a finger or thumb, and then place in tepid water to harden.

Most importantly: each exhibit must contain no more or less than the number of stems required under each Lot #, otherwise they will be disqualified. Count stems to be sure number is correct.

The following definitions must be heeded for proper exhibition:

Bloom: shall mean (1) flower, foliage as required.

Head: for cabbage and kale, the apical bud.

Stem: shall mean a single flower on one (1) stem with foliage required unless otherwise indicated.

Spike: shall mean a single stem possessing many individual florets, foliage as indicated.

Spray: shall mean 3 or more flowers per stem, with foliage.

Specimen: a typical representative of a genus, species, type or cultivar. Called for when there is a possibility of more than one bloom form per lot, as in Dianthus and cosmos, or for a foliage plant.

 1217H - Cosmos, small flowered, mixed colors - 3 stems

Dahlias

LOT

1218 - As dahlias are classed by size, form, type and color, it is not possible to list all Lots. Any Dahlia brought for exhibition will be assigned a Lot # corresponding to the American Dahlia Society classification. Numbers will be assigned by the Placement Committee and/or the Superintendent.

Large specimens, over 8" in diameter shall have one (1) bloom with attached foliage. Exhibits from 4-8" in diameter shall have three (3) blooms with foliage attached. If there are sufficient entries, color classes will be created. Exhibits up to 4" shall have three (3) blooms with foliage attached. If there are sufficient entries, color classes will be created.

 1230A - Geranium, single - 1 spray
 1230B - Geranium, double - 1 spray

Gladiolas

LOT

1231 - Gladiolas can be divided by color and size; for that reason the complete list of colors and sizes will not be listed. The Superintendent will divide the entries and assign Lot #s.

For instance, a white standard glad would be Lot # 1232-S/W; a miniature red would be Lot # 1232-M/R. Please tell the Superintendent the size and name of your entry.

Remove the unbloomed florets from the top of the glad; one missing floret from the bottom will not disqualify an entry.

LOT

- 1232 - Godetia - 3 stems
 1233 - Golden Glow - 1 spray

Grasses and Ornamental Foliage Plants

LOT

- 1234A - Ornamental Grass, named - 5 stems (bloom not required)

 1235B - Hollyhock, double - 1 spike, with foliage
 1236A - Lavatera, one (1) color - 3 sprays
 1236B - Lavatera, mixed colors - 3 sprays

- 1237A - Liatris, purple - 3 stems
1237B - Liatris, white - 3 stems

Lilies

Lilies bear more than one (1) flower per stem; all exhibits should be cut so that the stem and flowers are in proportion. No single flowers will be judged.

LOT

- 1238A - Lily, Asiatic - 1 stem
1238B - Lily, oriental - 1 stem
1238C - Lily, trumpet - 1 stem
1238D - Lily, reflex (tiger-lily form) - 1 stem

Marigolds

One set of leaves must be retained. Name of cultivar is helpful for classification purposes; the classes are based on size of types. Giant and large = *Tagetes erecta* and hybrids (often erroneously called African, but more properly American carnation flowered); small = *T. pumila* and hybrids (often called French or French Harmony); Signet = *T. tenuifolia* and hybrids.

LOT

1240 - Nasturtiums, one (1) color - 3 stems, no foliage
1241A - Nicotiana, one (1) color - 3 sprays
1241B - Nicotiana, mixed colors - 3 sprays

Pansies and Violas

No foliage required for these Lots.

Special exhibition required: Please show specimens so that the flower is on TOP of a covered container and the stems are in water under the cover. Be sure that the stems are in water.

Please ask the Superintendent if you have any questions about how to display pansies or violas.

LOT

- 1242A - Pansy, giant, over 3", one (1) color - 3 blooms
1242B - Pansy, giant, over 3", mixed colors - 3 blooms

DIVISION II – CONTAINER PLANTS

Exhibit container plants as if you were entering a beauty pageant; the containers and the plants need be cleaned and groomed of salt buildup, spent leaves and flowers, etc. It is important to keep the growth symmetrical by turning the plants on a regular basis. Do not use leaf polish on indoor plants; they will not be judged. Double crowns on specimen plants, like African violets are a serious exhibition fault. More than one plant per container is allowed unless otherwise excepted.

Regular care, proper light, fertilizer and water are essential to make a plant come to its full potential.

FLOWERING PLANTS

Only one plant per container except for trailing types. Add a "M" to the Lot # to enter an exhibit as a miniature. 1260A - would be an entry for a miniature single bi-color. Please name.

CACTI AND SUCCULENTS

Cacti and succulents are very similar types of plants which have adapted to drought in whole or in part of their life cycle. It is useful to know that all cacti are succulents but not all succulents are cacti. They are differentiated by the presence or absence of areoles, which are foreshortened branches. Little tufts of hairs, bristles or spines grow from these joints, which give rise to the flowers. All cacti have areoles; no succulents have them.
